Czech Republic

Summary

The purpose of the Senior Specialist DDIT APD ERP SCM will be to translate high level design and business requirements into SAP system solutions and implement in alignment with the design and architectural standards, while meeting quality, performance and security requirements

About the Role

Major accountabilities:

- Develop system designs that adhere to high level conceptual design and are traceable to functional as well as non-functional requirements in projects/enhancements
- Ensure designs produced adhere to architectural roadmap and support the development, execution and operations of solutions
- Deliver design solutions in line with system design standards (Core/Template)
- Ensure that solutions meet requirements outlined in the architecture handbook
- Perform scoping, fit-gap workshops for projects/enhancements, proposes solutions for key gaps, provide effort estimations and align with business teams
- Ensure that project/enhancements work is delivered to agreed time, cost and quality constraints following the release calendars
- Ensure that developed solutions are peer reviewed, formally documented and signed off by business
- Initiate solution testing to ensure these meet quality standards
- Follow standardized design and development processes to enable cost effective delivery
- Take accountability to ensure adherence with Security and Compliance policies and procedures within Solution Design scope
- Travel Requirements: this role will involve occasional travel (1-3 times per year)

Key performance indicators:

- Solution Quality; Cost efficiency; Delivery time; Customer Satisfaction; Achievement of KPIs for enhancements

Minimum Requirements:
Work Experience:

- University degree or adequate equivalent; Bachelor degree in business/technical and SAP knowledge in specified module(s)/process areas
- At least 6+ years' experience in business consultancy and SAP implementation in an international environment

- Proven experience in SAP implementations, detailed process analysis and design, system architecture, technology standards, CSV, GXP and SOX requirements
- Proven experience in understanding of SAP (MM/SD/LE/WM/TM) functionality, related business processes
- Experience in setting up complex logistics execution scenarios such as 3PL integration
- Good understanding how other functional areas relate to each other, the master data objects that they are using, but also how they integrate to: Procurement (SRM/Ariba), PP (Production Planning), QM (Quality Management)
- Knowledge of Pharma business: GxP regulations, Computer System Validation (CSV) methods.

Skills:

- Excellent communication and collaboration skills
- Able to leverage networks of professionals across functions and business areas
- Understands the competing organizational needs beyond own part of business
- Able to interpret complex information and to influence internal and external peers
- Demonstration of Novartis value and behaviors with ability to motivate and energize others

Languages :

- English: Very good spoken and written.
